

## Strengthening Participatory Organization (SPO) Situation Update on Baluchistan Flood Update July 28, 2010

Strengthening Participatory Organizations (SPO) is playing leading role in coordination among the all humanitarian actors including PDMA in Quetta. As it was decided in first meeting, CRS, PEACE Balochistan and IDSP will share the collected data of damages while SPO will share with all humanitarian actors.

It was decided yesterday in meeting with PDMA in presence of other Humanitarian actors that SPO will compile the assessment data of all organization to chalk out effective strategy.

SPO team complied data and presented in meeting today to PDMA in presence of all humanitarian actors which was highly appreciated by PDAM and other line departments. The representatives of PDMA valued leading role of SPO and all humanitarian actors in crisis from coordination to relief work to advocating miseries of affectees at different level. PDMA assured to share the findings with NDMA to take concrete step to address the miseries of affected communities.

The complied assessment report is based on data which is contributed by IDSP, CRS, Peace, District revenue department and SPO.

### Complied Assessment Report:

An initial assessment into the needs of flood affected people of Balochistan was carried out by Catholic Relief Services (CRS), IDSP and PEACE Balochistan. The objective of the assessment was to get more clarity on the actual situation of flood affectees of district Nasirabad, Sibi, Kohlu and Barkhan, their basic needs and their preferred durable solutions.

CRS has carried out initial assessment in district Kohlu and Barkhan through its partners (WESS, SEHAR, IDO and CDS). The assessment of the affected areas has been conducted with consultation and support of government authorities and NGOs. They collected information through 38 Focus group discussions, 38 key informant interviews, district administrations and direct observations. Key findings are that 2346 household affected from 22 villages of district Barkhan and 6550 household affected from 16 villages of district Kohlu.

IDSP conducted assessment in district Sibi through its staff and partners. Focus group discussions, key informant interviews and direct observations method used in collection of information of affected population.

PEACE Balochistan carried out the assessment through community based organizations in district Nasirabad and Bolan. Focus group discussions, key informant interviews and direct observations method used in collection of affected people.

SPO also received information through different local organizations and also included in this report.

It was observed during the assessment that affected people did not get proper assistance from any governmental and non governmental organizations. The total affected population is estimated about 100,000 whose dire needs are **shelter, food, safe drinking water and non food items**. It was also observed eighty percent population livelihood based on agriculture but it is almost destroyed all affected areas.

**The summary of the affected population with sources are follows;**

	District	Affected Population	Source
1	Sibi	40030	IDSP
2	Nasirabad	43054	PEACE & District Revenue
3	Barkhan	17132	CRS
4	Kohlu	45850	CRS
5	Bolan	2087	PEACE & District Revenue
	<b>Total</b>	<b>148153</b>	

Detail report of CRS

CRS Joint Rapid Assessment of Kohlu and Barkhan  
24-25 July 2010

S. #	District	Name of Village	Affected Population (Households)	Detail of Damages	Support from Govt.	Support from NGOs
1.	Kohlu	Village KulKhani	300	100%	Nil	Nil
2	Kohlu	Village Syed Mohammad KulKhani	300	100%	Nil	Nil
3	Kohlu	Village Mian Dad	250	100%	Nil	Nil
4	Barkhan	Village Balu Zakwani	56	100%	Nil	Nil
5	Barkhan	Village Nikri Zakwani	88	100%	Nil	Nil
6	Barkhan	Village Tota Zakwani	350	100%	Nil	Nil
	<b>TOTAL</b>		<b>1344</b>	<b>100%</b>		

The overall situation by sector and resultant needs in the six villages are described below.

Sector	Pre-flood Situation	Current situation	Needs
Water, Sanitation and Hygiene	<p><b>Villages in Barkhan</b></p> <p>Water sources are dug wells, boreholes and tube wells. Clean drinking water available.</p> <p>Small dry pit latrines used by women; men using open spaces for defecation.</p>	<p>All the water sources were filled with flood/rain water; currently communities are using muddy water from ponds.</p> <p>No resources available for making water potable.</p> <p>All latrines were destroyed and now both men and women are using open places.</p>	<p><b>Immediate needs</b></p> <p>Jerry can for water storage and water purification tablets (with community awareness sessions for use of water purification tablets)</p> <p>Sessions on Hygiene promotion</p> <p><b>Long-term needs</b></p> <p>Well repair, maintenance/ lining of water sources, construction of latrines</p>
	<p><b>Villages in Kohlu</b></p> <p>Latrines available.</p> <p>Government water supply and tube wells available.</p>	<p>Latrine destroyed. Pipelines were washed away. Electric supply system/ line destroyed.</p> <p>Lack of facilities for storing drinking water.</p> <p>Community is using contaminated water for drinking.</p>	<p><b>Immediate needs</b></p> <p>Jerry cans for water storage and water purification tablets (with community awareness sessions on use of water purification tablets)</p> <p>Sessions on hygiene promotion</p> <p><b>Long-term needs</b></p> <p>Latrine construction, maintenance of water sources, repairing of electricity connection, repair of pipelines</p>

Food Security	<b>Kohlu and Barkhan</b> The community stored their food items at their homes and purchased items from the market.	Stored food vanished with the flood water. Shortage of food items in market. No distribution of food items yet made by any organization.	<b>Immediate needs</b> Food items Non-food items, especially cooking utensils  <b>Long-term needs</b> Repair of damaged land Supply of seeds and fertilizer
Shelter	<b>Kohlu and Barkhan</b> The community lived in mud houses, constructed with wood and mud. Houses were generally large, as people lived with extended family.	Shelters are 100% destroyed in all targeted villages.	<b>Immediate need</b> Tents
Health services	<b>Kohlu and Barkhan</b> The villages were served by government Basic Health Units (BHUs).	The BHUs were destroyed. Increased cases of skin diseases, diarrhea, and malaria were reported to the assessment team.	<b>Immediate needs</b> Mosquito nets; health services and medications; safe drinking water, health and hygiene awareness sessions  <b>Long-term needs</b> Construction of BHUs. Repair of water resources for safe drinking water.

The survey has been conducted in district Kohlu in following villages;

S#	Village Name	Population (Households)	Percentage damage	Effected Househld
1	Village Mian dad	250	100%	250
2	Village Ferouzai	300	90%	270
